The Register of Accredited Metallic  
Phosphide Standards in the United Kingdom

## THE LOOMING LEGAL DEADLINE!

BE AWARE!

APRIL 2015

# The Looming Legal Deadline!

## Be aware!

After the 26th November 2015 this year it will be a requirement of the Plant Protection (Sustainable Use) Regulations 2012 that you hold a government approved certificate of competence before you can legally use professional products such as Talunex or Phostoxin.

This is for your safety and that of others around you.

Even if you have had previous training and you think you are authorised to use aluminium phosphide only the new approved Level Two certificate will be legally recognised after this date.

Distributors will ask to see evidence of this new certification!

To gain the certificate you will need to pass an individual assessment which can normally be achieved by after one day's training.

Your local distributor can advise you on this and provide you with the right information on where you can get this vital training

Alternatively visit **[www.ramps-uk.org/training](http://www.ramps-uk.org/training)** where the information is clearly set out for you.

Act now to ensure your best chance of being qualified in time

Don't delay - ASK TODAY!

## ALWAYS...

- Organise your stores to be locked, dry and signed appropriately.
- Permit only qualified people to access and use the product.
- Ensure you obtain and wear the correct PPE/RPE.
- Recap flasks only if they are completely empty, dust-free and ready for disposal.
- Apply only through the specified applicators and never by hand.
- Treat only rabbits, rats and moles and never any other animals.
- Order and use the right quantities needed for each job beforehand.
- Read the label before you start and then follow the directions for use.
